Biography:

Doumit has a Bachelor of Science Degree in Engineering from the University of Lebanon and he has completed additional courses and training at NC State University relating to Civil Engineering. Doumit began his career with NCDOT in 1989 with the Signals and Geometrics Section and was promoted to his current position as the Signals and Geometrics Contracts Engineer in 2000. He has obtained his Engineering Interim certificate and hopes to get his Professional Engineer's license in the not too distant future.
